

Collections Review Desk

AI-assisted call review with a recorded supervisor decision

THE PROBLEM

A case note claims a promise to pay. The customer disputes the amount. A supervisor needs the conversation evidence before acting.

THE WORKFLOW

Sarvam transcribes the Hindi-English call. A reviewer checks the words and speaker roles. Sarvam 105B compares the accepted transcript with the note and policy.

Code verifies quotations and payment addresses. The supervisor approves the next step; the app saves the decision and follow-up.

4 / 4

Synthetic case smoke checks passed with Sarvam 105B.

A small smoke evaluation, not a production accuracy estimate.

FIRST BANK PILOT

Historical calls and supervisor review. Measure missed concerns, false alarms and review time. Connect the existing case system.

Synthetic evidence only. Demo personas and bank follow-up queues are simulated.
